

RAHUL GUPTA

SDET-II | QA Automation Engineer | Java Test Engineer

rahulgupta.12328@gmail.com | +91-9131042507 | GitHub: riccky56 | linkedin.com/in/rahul-gupta-295323175

PROFESSIONAL SUMMARY

Results-driven SDET-II / QA Automation Engineer with 4+ years of progressive experience delivering scalable test automation, API validation, and CI/CD-integrated quality engineering for large-scale consumer and enterprise platforms. Engineered 750+ test cases across web, mobile, API, and accessibility layers cutting manual effort by 50%, shrinking defect leakage by 45%, eliminating 80% of recurring bugs, and accelerating regression cycles by 60%. Expert in Java-based automation frameworks (Selenium, TestNG, Cucumber BDD, Rest Assured, POM), Salesforce CRM integration testing, and CI/CD pipelines (Jenkins, GitLab, Azure DevOps). Applies AI productivity tools Microsoft Copilot, and Claude to accelerate test design, defect analysis, and QA documentation. Combines SDET engineering depth with a product mindset and cross-functional Agile deliver directly applicable to high-reliability, compliance-driven environments

TECHNICAL SKILLS

Languages: Java (OOP, Collections, XPath, Exception Handling), Python, SQL, JavaScript, SenseTalk
UI Automation: Selenium WebDriver, TestNG, JUnit, Cucumber BDD, Page Object Model (POM), Eggplant Functional, TOSCA
API Testing: Rest Assured, Postman, Salesforce Workbench, RESTful API validation, JSON/XML schema testing
CI/CD & DevOps: Jenkins, GitLab CI/CD, Azure DevOps, Git, GitHub, Maven, Software Configuration Management
Platforms & Tools: BrowserStack, Salesforce CRM, PRISM, Eclipse IDE, qTest, JIRA, Azure DevOps
Mobile & Accessibility: Appium, BrowserStack (iOS/Android), VoiceOver, TalkBack, WCAG 2.1
Databases: SQL, PostgreSQL, Oracle — complex query validation, ETL data verification, large dataset comparison
AI Productivity: GitHub Copilot, Microsoft Copilot, Claude — test design, defect analysis, documentation
Testing Types: Functional, Regression, Smoke, Sanity, Integration, UI, API, Mobile, Cross-Browser, UAT, Accessibility, Performance
Methodologies: Agile/Scrum, SDLC, STLC, TDD, BDD, Shift-Left Testing, Defect Lifecycle, Risk-Based Testing, Change Management

PROFESSIONAL EXPERIENCE

SDET – Consultant · Deloitte

Sep 2025 – Present

Project: Exelon ADMS (Advanced Distribution Management System) | Utility / Energy Sector

- ▶ **Test Cases Built: 200+** ▶ **Manual Effort Reduced: 70%** ▶ **Regression Accelerated: 60%**
- ▶ **ADMS Modules Covered: 4** ▶ **Script Authoring Time Saved: ~40%**
- ▶ Architected and automated **200+** confidence test cases across OMS, SOM, DMS, and SCADA workflows, reducing manual QA effort by **70%** and improving execution consistency across mission-critical utility operations.
- ▶ Accelerated regression cycle by **60%** by building end-to-end automation suites covering job creation, crew workflows, role-based permission validation, console behaviour, and DMS notes lifecycle scenarios.
- ▶ Delivered automation using Eggplant Functional and SenseTalk across **4** integrated ADMS modules, expanding workflow coverage and improving suite reliability through targeted script stabilisation.
- ▶ Reduced environment-related test failures by **35%** by identifying and resolving unstable test flows, environment dependencies, and workflow variability through stronger validations and better test design.
- ▶ Served as primary QA contact for the Exelon client team — aligning daily on testing progress, requirement clarity, delivery priorities, and issue resolution across all ADMS testing tracks.
- ▶ Leveraged GitHub Copilot, Microsoft Copilot, and Claude to cut test script authoring time by **~40%**, streamline defect summarisation, and accelerate QA status communication.

QA Engineer – Associate · Cognizant Technology Solutions

Sep 2022 – Aug 2025

Project: Pet Services – Retail | Client: PetSmart Inc. | US & Canada E-Commerce

- ▶ **Test Cases: 550+** ▶ **Manual Effort Reduced: 50%** ▶ **Regression Accelerated: 60%**
- ▶ **Defect Leakage Reduced: 45%** ▶ **Recurring Bugs Eliminated: 80%** ▶ **Issue Visibility Improved: 50%**

- ▶ Owned end-to-end QA delivery across **3-week** Agile sprint cycles for **2** high-traffic e-commerce platforms (US + CA), executing Functional, Web, API, Cross-Browser, Mobile, UI, and Accessibility testing.
- ▶ Authored and executed **550+** manual and automation test cases; reduced defect leakage by **45%**, improved application stability by **30%**, and achieved zero critical production escapes over **6** consecutive releases.
- ▶ Designed and maintained a Selenium WebDriver + Java + POM + TestNG automation framework that cut manual testing effort by **50%**, accelerated regression cycles by **60%**, and supported **2** concurrent e-commerce sites.
- ▶ Built scalable automation using Java OOP principles, XPath, Collections framework, dynamic waits, exception handling, and Cucumber BDD — producing a maintainable, reusable test codebase across **10+ sprint** releases.
- ▶ Integrated CI/CD pipelines via Jenkins and GitLab, reducing test feedback loop from **48 hours** to under **4 hours** and enabling same-day defect visibility for development teams.
- ▶ Performed end-to-end REST API testing with Rest Assured and Postman across **100+** Salesforce CRM integration endpoints, driving an **80%** reduction in recurring API defects across **12+ releases**.
- ▶ Integrated TOSCA for regression automation, increasing test coverage by **60%** and cutting full regression suite execution from **6 hours** to under **2.5 hours**.
- ▶ Delivered JIRA and Azure DevOps QA dashboards, WSRs, and MSRs to **3** client stakeholders — improving issue tracking visibility by **50%** and reducing defect resolution time by **25%**.
- ▶ Executed cross-browser and mobile compatibility testing across **8+ browser/device** combinations using BrowserStack; performed iOS VoiceOver and Android TalkBack accessibility validation for WCAG **2.1** compliance.
- ▶ Leveraged GitHub Copilot and Microsoft Copilot to accelerate locator updates, test case authoring, and defect summarisation — saving an estimated **5+ hours** per sprint.

QA Analyst · Cognizant Technology Solutions

Aug 2021 – Sep 2022

Project: Pet Hotels – Retail | Client: PetSmart Inc.

- ▶ **Sprints Supported: 12+** ▶ **Release Quality Improved: 35%** ▶ **Regression Effort Reduced: 65%**
- ▶ Participated in full Agile ceremonies across **12+ sprints** — stand-ups, sprint planning, backlog refinement, and retrospectives — maintaining continuous sprint-level quality alignment.
- ▶ Executed **6** testing types (Functional, Integration, Smoke, Sanity, Regression, Ad-hoc) across retail workflows; improved release quality by **35%** through structured test coverage.
- ▶ Conducted API testing with Postman across **50+ endpoints** and validated backend responses with SQL queries across **3** database schemas to ensure data integrity.
- ▶ Performed end-to-end functional testing on PRISM (Salesforce), validating order flows, appointment scheduling, and loyalty programs across **4** integrated retail systems.
- ▶ Developed and maintained Selenium + Java + TestNG regression scripts covering **100+** scenarios, achieving a **65%** reduction in manual regression effort.
- ▶ Logged and managed **200+** defects in qTest and JIRA with detailed reports, driving average defect closure within **2 sprints** through structured triage meetings.

EDUCATION

Bachelor of Technology (B.Tech)

2017 – 2021

S.R.M Institute of Science and Technology, Chennai **85.66%** | **First Class with Distinction**

CERTIFICATIONS

- ◆ Tricentis TOSCA Automation Specialist 2 (AS2)

◆ Selenium WebDriver with Java
- ◆ Salesforce Certified Administrator

◆ GenAI & AI Agents for QA Automation | Copilot & Claude
